

Concrete Reinforcing Steel Detailer

Location:

Canton, Ohio

Description:

Detailing is a pivotal responsibility between the design and construction operation on every project. It combines basic drafting skills with good communication skills. A detailer works with CAD to produce accurate placing drawings in a timely manner for concrete reinforcing steel. The detailer works closely with fabrication shops, field personnel, contractors and engineers during a project.

Experience:

- Willingness to learn
- Good communication skills
- Interest in the construction industry
- Able to read construction documents
- CAD experience helpful

Company:

The Whitacre Engineering Company is a sub-contractor that specializes in concrete reinforcing. We estimate, detail, fabricate and place concrete reinforcing bars throughout Ohio, Pennsylvania and New York.

We offer:

- Full time employment
- Benefits
- Completive salary
- Full training
